

In 2017, the Wyoming Breast Cancer Initiative (WBCI) and the Wyoming Community Foundation created a grant program to support statewide early detection screening vouchers for underserved Wyoming women. The Department of Health's Wyoming Cancer Resource Services (WCRS) will manage the vouchers and report annually to the WBCI. Each WCRS program manager will be responsible to negotiate with the breast screening facility in their region the cost of the cancer screening and radiologist reading. The WCRS will provide the voucher as a commitment of payment to the breast screening facility's billing department and the billing department will in turn bill the WCRS fiscal agent. The WCRS manager will use the voucher to verify with the fiscal agent the services rendered. For more information, please contact the WCRS program manager listed below or email [info@wyomingbreastcancer.org](mailto:info@wyomingbreastcancer.org).
